

## About the Editors

D. Robert Lu received his PhD degree in Pharmaceutics from Purdue University in 1990. After working for 2 years (1990–1992) as an assistant professor at Idaho State University, he transferred to the College of Pharmacy, University of Georgia. In 2003, he moved to the School of Pharmacy at Temple University, where he holds a full professorship in pharmaceutics.

Dr. Lu's research focuses on drug targeting to cancers and cellular delivery of genetic materials using various delivery systems. He has published more than 60 peer-reviewed papers and an additional 70 meeting abstracts. In addition, he has served as the major professor for 16 graduate students, 14 of whom have accepted various academia and industry positions nationwide.

Svein Øie is professor and dean at the College of Pharmacy, University of Georgia. He received his pharmacy degree from the University of Oslo and served in the Norwegian Army as a lieutenant. He received his PhD in Pharmaceutics from the State University of New York at Buffalo in 1975 and spent the following 24 years at the University of California, San Francisco. In 2000, he joined the College of Pharmacy, University of Georgia as professor and dean.

Dr. Øie's research focuses on drug development in the area of oral absorption of peptides and cellular delivery, and on the effect of disease on drug distribution and elimination. His work includes more than 100 publications, and he has presented more than 80 papers and invited lectures at national and international meetings.
